

The 4th International Conference on Environment, Energy and Development (ICEED, 2018) Kigali , August 13th -14th2018

Xinjiang Institute of Ecology and Geography, Chinese Academy of Sciences

Theme: *Action to sustain the benefits of ecosystem services*

The University of Lay Adventists of Kigali in collaboration with the Xinjiang Institute of Ecology and Geography, Chinese Academy of Sciences (CAS) will hold the 5th Annual International Conference on Environment, energy and development.

The Conference theme " *Action to sustain the benefits of ecosystem services* " seeks papers for practical solutions to address the research responsibility to solve complex challenges of ecosystem services which are not matching with societal resilience.

This 5th ICEED 2018 is inspired from the critical challenge of human, environmental, and economic sustainability concerning the present and future generations in a global-scale context.

The 4th ICEED 2017 follows the others series of International Conference on Environment, Energy and Development as an interdisciplinary forum for social scientists, life scientists, engineers, policy makers, NGOs and practitioners to present their latest research results, ideas, developments, and applications in all areas of Sustainable Development especially on Environmental, Health, Energy, Economic, and Socio-Cultural Issues.

The aims of the conference:

- ✓ Share and identify practical evidence-based solutions that can support the sustainability agenda.
- ✓ Create an active network of researchers/stakeholders with interest in and concern for sustainability in a holistic perspective, with environmental, cultural, economic and social concerns intersect.
- ✓ Promote development of a new base of scientific knowledge that is specifically aimed at societal transformation for sustainability.

Main directions

Environment Sustainability

- Climate change and Global warming
- Resources management
- Sustainability and the built environment
- Environmental management
- Climate and disaster resilience
- Management of ecosystems, environment and water resources
- GIS & Remote Sensing applications
- Waste management
- Disaster management
- Practice, research and innovation in emergency management

Energy & Socio-Cultural Sustainability

- Energy resources and technology
- Clean energy development
- Clean energy development and investments
- Innovative clean technology
- Energy policy, access and security
- Energy technologies
- Urbanism
- Rural Development
- Education
- Sociology
- Health and Society

Energy & Socio-Cultural Sustainability

- Energy resources and technology
- Clean energy development
- Clean energy development and investments
- Innovative clean technology
- Energy policy, access and security
- Energy technologies
- Urbanism
- Rural Development
- Education
- Sociology
- Health and Society

Special sessions, posters and oral presentations will be included to the conference program.

Participation fee for non-presenters is 30\$

All of the selected papers will be published in the conference proceedings and are eligible for free publication in the East African Journal of Science and Technology (ejournal.unilak.ac.rw).

Important dates

- May 31st 2017: Abstract submission
- June 6th 2017: Release of notice of acceptance (Abstract)
- July 10th 2017: Deadline for submission of full papers
- July 20th 2017: Release of notice of acceptance Full Paper
- July 31st 2017: Corrected Full Paper Submission
